

KeepItSafe[®] DR

THE NEXT GEN BUSINESS CONTINUITY SOLUTION

Rescue your data from oblivion.

The future of data backup is here.

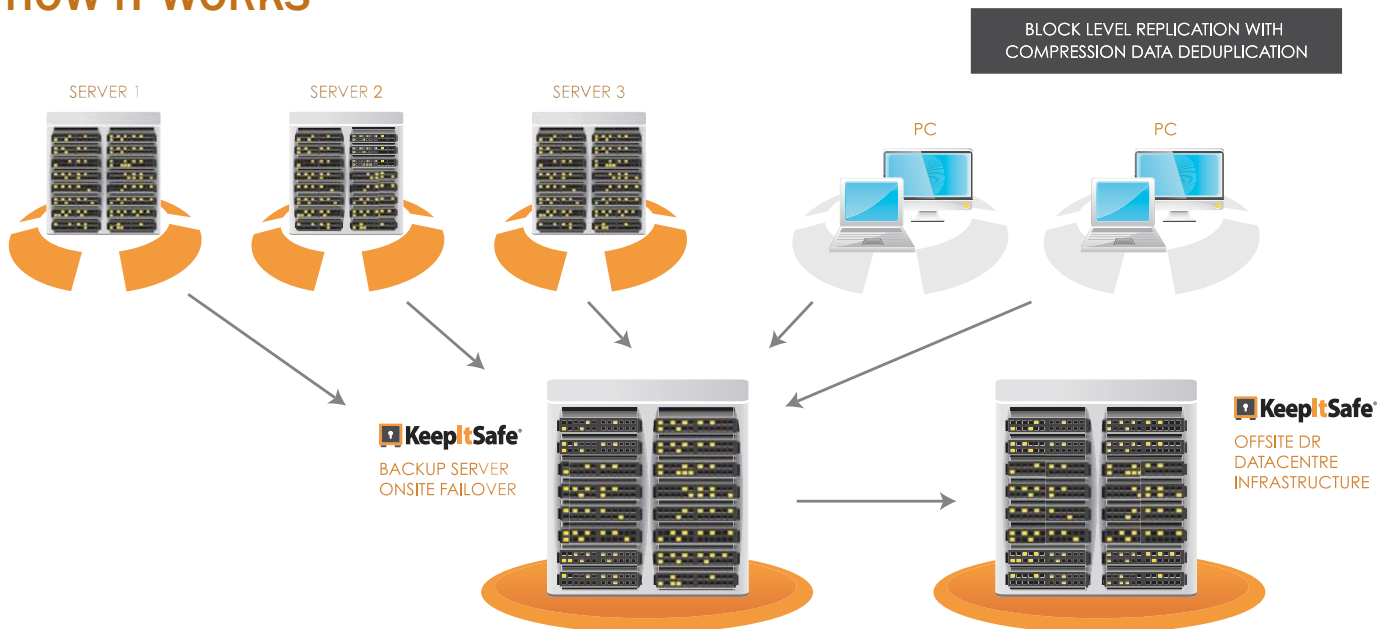

KeepItSafe DR is the only all-in-one online backup and disaster recovery solution to fully protect your servers and office environment while ensuring minimal downtime and the ability to access your data anywhere there's an Internet connection.

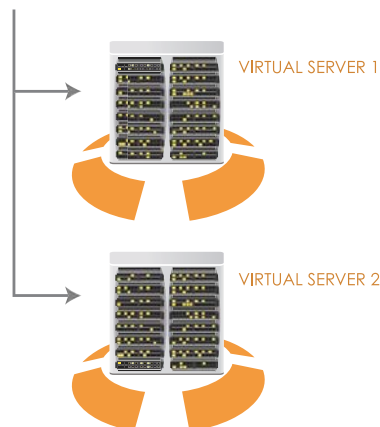

KeepItSafe DR helps your company:

- Achieve a secure and reliable DR system.
- Achieve bare-metal recovery (data restoration from the ground up) after catastrophic failure.

HOW IT WORKS

Running **KeepItSafe DR** on your Windows servers provides fast recovery of any object, from a total bare metal restore of the entire server to an individual file recovery in just minutes. Built-in deduplication allows **KeepItSafe DR** backup snapshots to be stored locally to the onsite failover server or offsite to KeepItSafe's ISO certified datacentre facilities.

KeepItSafe DR provides deep application integration with today's mission-critical Microsoft applications, including: **MICROSOFT EXCHANGE | MICROSOFT SQL | MICROSOFT SHAREPOINT | MICROSOFT HYPER-V | VMWARE**

RECOVERY OF MISSION-CRITICAL WINDOWS APPLICATIONS

TURN DOWNTIME RIGHT SIDE UP AGAIN

The KeepItSafe DR solution is the world's most robust backup and disaster recovery solution for protecting Microsoft Windows Servers, VMware vSphere and ESX(i) Servers.

- Consistency checks on all applications to ensure they're recoverable
- Block level snapshots with incremental forever data capture
- Integrated data deduplication
- Flexible disaster recovery options: bare metal restore & failover virtual machines
- Server rewind: rolling back to any point-in-time & recovering the entire server
- Cost-effective remote office protection

Even if you experience a full server crash the KeepItSafe DR solution can give you access to your emails, folders, files and full server in minutes. Critical to your business continuity planning.

KeepItSafe installs, manages, and monitors your KeepItSafe DR solution so you can stay focused on running your business. By taking continuous snapshots of your application data, KeepItSafe DR completely eliminates the need for backup windows and significantly reduces your recovery point objective.

ONE OF A KIND

KeepItSafe DR is the world's fastest and easiest backup and disaster recovery software for Windows application servers. The only complete all-in-one backup and recovery software solution that enables local recoveries from any type of failure in just minutes, with the added assurance of offsite application and data backup to KeepItSafe's datacentre facilities.
